

Managed Cloud Security

Powered by Zscaler

The mobile workforce of today is dependent on both cloud applications and a secure connection to the internet.

By combining our highly certified security engineers with the best cloud-security solution on the market, rest assured that no matter where your team is, they're both connected and protected.

CentraComm's Managed Cloud Security leverages the threat intelligence harnessed from the Zscaler cloud. Now any business, regardless of size or location, can securely connect to the internet. Zscaler is unique in that it's the only multi-tenant, distributed cloud security platform built from the ground up. When paired with our proven management model, customers discover a dependable security resource.

Protect any user, on any device, from any location.

CentraComm's team has many years of experience setting up and properly maintaining the Zscaler Cloud Service. Our managed service assures your team, regardless of location, will be properly setup to stay secure with Zscaler's over 100 cloud data centers across the world. With it's focus across all device types and internet of things, it's no wonder that Zscaler has a customer base of over 15,000,000 users.

Why Managed Cloud Security

1

Secure Everywhere

Your most abundant resource is also the most vulnerable to security breaches, **your team**. By creating a security policy that enables users to stay secure regardless of the device or where they are browsing from.

2

Reduce Bandwidth

Zscaler enables customers to segment traffic based on it's final destination. Because of this, many customers see tremendous cost savings by only backhauling web traffic related to the business.

3

Full Management

CentraComm takes the ongoing management and monitoring off the plate of our customers. We will notify you of alerts that impact your priorities and your network, while you focus on projects related to the growth and sustainability of your business.

4

Highly Scalable

By utilizing a cloud security product, as your team grows, your security footprint grows as well; allowing you to only pay for what you use regardless of where you are using it.

Managed Cloud Security

Powered by Zscaler

Simple pricing.
Unlimited management.
Around-the-world security.

Our managed cloud security solution was put together to meet the demands of our customers. Now you are able to budget security costs based upon the number of people on your team, allowing you the flexibility to stay secure regardless of device count. Additionally, our simplified pricing model and Zscaler engineering expertise assure that your network, your staff, and your budget remain stable and secure.
