

# CENTRACOMM

Trusted to secure and manage high-performance networks.

## Services Offering

CentraComm is your source for network, security and data-driven success, delivering a comprehensive suite of solutions and services to help organizations plan, build, and run effective systems. We combine extensive expertise and field experience with powerful partnerships with industry leaders to help our clients achieve their technology goals. Whether it's a solo project or ongoing management, you're in the good hands of our company's greatest asset.

### PROFESSIONAL SERVICES

Our engineering expertise is displayed best through our various professional services. With a team of over 20 engineers, CentraComm has the talent and industry experience to make sure projects are delivered in a timely manner. Many of these services stretch across multiple partners and are designed to take projects off your plate while delivering a piece of mind.

### MANAGED SERVICES

Our unique approach to managed services is highlighted when we provide the comfort of co-management combined with the convenience of around-the-clock support. It's our goal to help you remain secure and productive by offloading processes that can slow you down.

#### JUNOS SPACE MANAGEMENT

Achieve the ultimate level of network security and efficiency by combining CentraComm's team of Juniper certified engineers with the management of Junos Space, Network Director and/or Security Director for your Juniper devices.

#### ZSCALER MANAGEMENT

CentraComm's managed cloud security combines the threat intelligence harnessed from the Zscaler cloud and our Zscaler certified U.S. based 24X7 NOC. Zscaler management by CentraComm assures your team, regardless of location, will be properly setup to stay secure with Zscaler's over 100 cloud data centers across the world.

#### SECURE APPLIANCE MANAGEMENT

CentraComm wraps ongoing monitoring, maintenance, and support around your security appliances while delivering technical support for teams looking to securely reclaim more time in their day.

#### SPLUNK & SIEM MANAGEMENT

Splunk and SIEM management offered by CentraComm allows organizations to utilize a highly-certified and around-the-clock team to monitor and deliver data-driven intelligence needed to make secure decisions.

#### ROUTER & SWITCH MANAGEMENT

Find performance and piece of mind across your network when CentraComm's engineering team implements best practices and around-the-clock monitoring and support for the routers and switches that drive your network.

#### SECURE ACCESS MANAGEMENT

In today's world, connecting remotely requires granular access considerations and unwavering connectivity. Experience our seamless and secure connectivity through one of the strongest remote access solutions in the market.

#### PANORAMA MANAGEMENT

Receive an umbrella of global firewall management for your distributed Palo Alto network, with streamlined reporting, policy management, and data-driven analysis from CentraComm.
